DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Bertrand US2834606, of record.

Bertrand discloses an air bag device D for an occupant seated in a rearmost seat 12 of a vehicle, the seat having a backrest and a seat portion extending from the backrest toward the front of the vehicle. The air bag device comprises an air bag 33 accommodated in an upper rear end portion of the vehicle in a folded state when the bag is not deployed (Figure 1), an inflator 21 supplying gas to the airbag, wherein when the gas is supplied to the air bag it is unfolded downward to be inflated between the backrest and rear window glass 15 of the vehicle (note Figure 2 and compare with Figure 1 to see that the air bag from device D has deployed downwardly to rest between glass 15 and the top of the backrest of seat 12). As broadly and functionally recited, the rear of top 13 is an unfolding direction controlling mechanism for controlling the unfolding direction the air bag such that the air bag is unfolded along the rear window glass.

Claim Rejections - 35 USC § 103

Art Unit: 3616

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 28-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertrand in view of Igawa US006186544B1.

Igawa discloses in Figure 1(G) a rolled portion of an air bag 1 so that when the airbag deploys along a glass windshield (Figure 2) it deploys more smoothly and prevents undesired pressure on the windshield without increasing cost (last two lines of abstract). As broadly and functionally recited, the rolled portion of the non-inflated air bag functions as an unfolding direction controlling mechanism inasmuch as applicant's rolled portion in the invention. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify to include a rolled portion controlling unfolding direction in view of Igawa in order to smoothly deploy the air bag and prevent

Art Unit: 3616

undesired pressure on the glass (claim 28). In the combination (claim 29) Igawa's rolled portion is rolled in a way to cause the air bag to approach the rear window glass inasmuch as applicant's invention.

Allowable Subject Matter

6. Claims 10, 12, 26, 35-36, 38, and 40 are allowed.
7. Claims 30 and 42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. The examiner regrets the earlier indication of allowability.
